Challenge

When replacing wishbones on the BMW 3-series E46, it's usually necessary to fit both wishbones and rear bushings, which are supplied separately. The technician has two options: replace the bushing including the separate aluminium housing, or to replace just the bushing reusing the old housing – both are time-consuming and delay the repair.

MOOG Easy solutions:

- ▶ These new wishbones are already fitted with the bushing and aluminium housing.
- ▶ Simply swapping the old wishbones for new, this kit means a faster, safer repair.
- ▶ Top product quality backed by a 2-year warranty.

MAKE IT EASY. MAKE IT **MOOG**
